

How Do I Get a New Hot Tub into My Back Garden?

Having a new hot tub or swim spa from **Hot Tub Barn** can be an exciting time, especially if you have never had one before. However, in your mind, it may be a logistical nightmare. You don't have back garden access. The alley to your garden is thin. Your outdoor space is accessed by steps. These may seem like serious issues that may deter you from getting a hot tub or swim spa. But fear not! This is no hindrance to our install team!

Polhill Hot Tub Barn staff have been transporting and installing hot tubs since 1996. We once craned a hot tub and a grand piano onto a roof terrace in Piccadilly Circus!

No hot tub delivery or installation is too challenging for us.

How Do You Get a Hot Tub From A to B?

We have a fleet of vehicles, including a 7.5 tonne truck that can carry two hot tubs or a hot tub and a building. We also have a 16ft flatbed delivery truck, vans and a larger Hiab truck for exercise pools and swim spas. Our range of different vehicles means we can deliver your hot tub even if you live down a narrow lane or a confined cul-de-sac.

In terms of getting your new hot tub from the vehicle to your garden, this is where we have to use machinery and man-power. Hot tubs weigh up to 1,400kg. This means we use either a Hiab equipped truck or crane to get the hot tub to its destination.

For homes with simple garden access, the team will typically utilise the Hiab arm (like a small crane) to place the hot tub/swim spa onto a dolly and carefully wheel it to where it needs to be. In more complicated scenarios, we use a crane - this is commonplace for us here at Hot Tub Barn. We don't own our own crane, but can recommend trusted partners to help. We will be on-site throughout the entire process and will communicate with the crane operator whilst they lift your new hot tub or pool over your home and into place. It may seem daunting, but this really is very normal and the team make sure everything is safe.

**Please note: a crane is an additional cost.*

Things to Look Out for with Hot Tub Installation

Hot Tub Barn have never failed to deliver and install a hot tub or swim spa purchased by one of our customers. The only elements that ever cause us issues tend to be telephone or electricity wires. We will always visit your home before a delivery to plan out our process and we will get in touch with the relevant personnel should any wires need to be temporarily removed. Furthermore, if a crane is needed and you live on a busy road we will likely need to let the local council and police know. This is just to make sure everyone is aware and safe. We have never been denied permission. So, if you are dubious about purchasing a hot tub due to logistical issues, don't be! The team at Hot Tub Barn is ready to deliver and install your hot tub or swim spa quickly and safely!
